Hot Runner Technology

INCOE Hot Runner Systems are the heart of the injection molding process, managing and controlling Melt Logistics® inside the mold.

For over 60 years, INCOE has provided mold builders with hot runner technology solutions throughout the entire process - from engineering mold review and filling simulation to on-site technical support.

Beginning January 1, 2021, INCOE Corporation is pleased to offer AMBA members 15% off their next order of (1) I-Series or I-Series Pro Temperature Controller. INCOE Temperature Controllers can be used as a useful testing device within a mold building facility or can be supplied as a package solution to customers.

Offer only valid if a written acknowledgment of this offer is included with the order.

Orders must be placed prior to the end of the 2021 calendar year. For more information on INCOE products, visit www.incoe.com.
