## Hot Runner Technology

INCOE Hot Runner Systems are the heart of the injection molding process, managing and controlling Melt Logistics® inside the mold.

For over 65 years, INCOE has provided mold builders with hot runner technology solutions throughout the entire process - from engineering mold review and filling simulation to on-site technical support.

**INCOE Corporation is pleased to offer AMBA members 15% off their next order of (1) I-Series or I-Series Pro Temperature Controller. INCOE Temperature Controllers can be used as a useful testing device within a mold building facility or can be supplied as a package solution to customers.**

Offer only valid if a written acknowledgment of this offer is included with the order.

Orders must be placed prior to the end of the 2024 calendar year. For more information on INCOE products, visit [www.incoe.com](http://www.incoe.com).
